

WARRANTY TERMS

All MAFELL tools are manufactured in accordance with all EU standards and regulations, are thoroughly inspected, and undergo strict quality control before leaving the factory, in line with the most stringent EU specifications.

The warranty is provided under the following conditions:

The warranty covers, free of charge, the repair of defects in tools that occur within the warranty period and are demonstrably due to material failure or manufacturing defects.

The warranty period is 36 months for machines registered in the warranty system. If no registration has been completed, the warranty period is 12 months for professional users and 24 months for private users. The warranty becomes valid from the date of purchase, as indicated on the invoice or receipt, which serves as the determining document.

The following are excluded from the warranty:

1. Consumable materials and defects resulting from normal wear and use, such as carbon brushes, drill chucks, bearings, cables, seals, etc.
2. Batteries and chargers.
3. Damage caused by failure to follow instructions, improper use, unsuitable environmental conditions, abnormal operating conditions, overloading, or insufficient maintenance.
4. Damage resulting from the use of non-original accessories or spare parts.
5. Tools that have been modified or tampered with by unauthorized personnel.

Repairs covered under warranty are carried out by replacing worn or defective parts, and the tool is returned in full working condition after thorough inspection.

To validate the warranty, the invoice or purchase receipt must be presented, clearly indicating the purchase date and product description. Tools that have been opened or repaired by unauthorized personnel void the warranty. Tools under warranty must be sent to the company's authorized service center at the purchaser's expense and risk. After repair, the tools are returned under the same terms.

No claims other than those stated in this warranty document for the repair of power tools are valid.

A warranty claim does not extend or renew the warranty period of the tool.

The manufacturer and its representative bear no responsibility for any damage or loss of profit due to interruption of business activities caused by the product or by a non-functional product. The manufacturer and its representative are not liable for any form of injury or for incidental, accidental, special, or consequential damage to persons or property arising from the use (or during the use) of the tool.
