

WARRANTY TERMS

The design of these tools has been carried out from the outset in accordance with all EU standards and regulations, with a focus on user convenience and service.

We also assure you that these tools have been manufactured using the most modern production methods and the highest quality materials, and have been tested prior to leaving the factory, in accordance with the strictest EU quality control standards.

All MAGIO nailers are covered by a ONE-YEAR WARRANTY from the date of purchase for all components, excluding consumables (Driver Blades, O-rings, Bumpers).

Any component found to be defective due to workmanship or material within the warranty period will be replaced free of charge. Inspection, disassembly, repair, and reassembly of the tool will also be carried out free of charge.

This warranty becomes void if the tool has been misused or abused, operated under adverse conditions (such as excessive air pressure, poor or no lubrication, high humidity, etc.), used with incorrect fasteners, repaired or modified outside our authorized service center, or not properly maintained.

If it is determined that the damage is not due to a manufacturing defect, the purchaser will be charged for all costs (inspection, disassembly, spare parts, repair, reassembly).

Tools under warranty must be sent to our authorized service center at the purchaser's expense and risk, accompanied by proof of purchase and a written description of the problem or complaint. After repair, the tools are returned under the same terms.

No claims other than those stated in this warranty document for repair of electrical tools are valid. The warranty period is neither extended nor renewed after a warranty claim has been processed.

Due to the extremely low retail price of MAGIO tools, spare parts are NOT available after the warranty period has expired. This does not imply a limited lifespan. A properly maintained and lubricated tool, operating under normal and controlled conditions, can serve you for many years.

The manufacturer and its distributor bear no responsibility for any damage or loss of profit due to interruption of business activities caused by the product or by a non-operational product. They are also not liable for any form of injury, nor for incidental, accidental, special, or consequential damage to persons or property arising from the use (or during the use) of the tool.
